DETAILED ACTION

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 78, end of line 12, after “;” add “and”.

Claim 88, end of line 12, after “;” add “and”.

Specification

The title of the invention is not descriptive. Since the application is in condition for allowance. A new title which is clearly indicative of the invention that the claims are directed, is required in response to this office action.

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Allowable Subject Matter

Claims 78-100 are allowable.

The following is an examiner's statement of reasons for allowance: Claims 78-100 are allowed over the prior art of record. The prior art fails to teach or suggest a method and an apparatus for gathering spatial information that implements following technique and steps:

1) Retrieving an over sampled delta-sigma modulated sequence for a selected set of channels of a transducer array from a memory;

2) delaying the sequence of each channel of the selected set within a transmit/receive delay register to steer a transmitted ultrasonic beam;

3) counting a number of samples of the delta-sigma modulated sequence to detect an end of a transmit sequence;

4) detecting a reflected signal at the end of the transmit sequence on each channel of the selected set of channels;

5) delta sigma modulating the detected signal of each channel;

6) dynamically delaying a corresponding set of delta-sigma modulated samples from among the channels of the modulated detected signals in the transmit/receive delay register; and

7) summing a corresponding set of delta-sigma modulated values to provide an output signal whose amplitude corresponds to a signal intensity of the formed beam as a function of range.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to application's disclosure. The cited references relate to claimed subject matter.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LAM T. MAI whose telephone number is (571)272-1807. The examiner can normally be reached on 6:00 am - 4:00pm.
